Education

The University of Sydney

Masters in Computer Science

Feb. 2026 – Present

Sydney, Australia

Bennett University

Bachelor of Technology in Computer Science and Engineering — CGPA: 8.99/10

Oct. 2020 – June 2024

Greater Noida, India

Experience

Esprit Analytique

June 2024 – Dec 2025

Lead Full Stack Developer

Remote

- Led the end-to-end development of **ProdigiDesk**, architecting a scalable full-stack system using **React** for the frontend and **Python** for the backend with **PostgreSQL**; drove multiple UI revamps to deliver smooth, responsive, and localized user experience using **JSON-based multilingual support**, and built the company's official website from scratch.
- Designed and implemented a robust application-wide **security layer** using **Python**, including **AES encryption** for secure API communication, a **hybrid AES + RSA key exchange mechanism**, and a **proxy-based API architecture**.
- Owned cloud deployment and DevOps strategy by containerizing applications with **Docker** and deploying frontend and backend services on **AWS EC2**; implemented **Azure CI/CD pipelines** for automated builds and deployments.

NEC Corporation India Pvt Ltd

Oct. 2023 – April 2024

Java Developer Intern

Noida, India

- Designed and developed **RESTful APIs** as a back-end **Java Spring Boot** developer, achieving **85% code coverage optimization**, delivering efficient, **scalable**, and robust functionality to support critical application components.
- Strengthened front-end performance by seamlessly integrating **REST APIs** with **responsive design** principles, resulting in a **25% increase** in user engagement and enhanced **cross-device compatibility**.
- Partnered with **cross-functional teams** to architect and implement innovative **UI designs**, prioritizing **user-centric features** that elevated user experience, streamlined interaction flows, and aligned with organizational goals for functionality and aesthetics.

Projects

ProdigiDesk | *Python, React, Postman, Git, AWS (EC2), JWT, RSA*

June 2024

- * Engineered a high-performance full-stack platform using **React** and **Python**, leveraging **Google Cloud Platform (GCP)** to optimize server-side rendering and metadata management, resulting in a **20%** increase in SEO-driven organic traffic.
- * Hardened application security and transaction integrity by implementing **AES + RSA encryption** and **JWT**, resulting in zero unauthorized access incidents and seamless **Razorpay** integration for **100+** secure payments.
- * Optimized system scalability and localization speed by **50%** through **Docker** containerization and a custom **multi-processed** Python translation engine, eliminating manual overhead in the CI/CD pipeline.

PICSA | *Java, Apache POI, Spring Boot, Git, React*

November 2023

- * Improved user engagement by 20% and reduced page load times by 15%, enhancing interface responsiveness and user experience by developing the front-end using **React**.
- * Enhanced data reporting and analysis capabilities, enabling actionable insights for stakeholders, by implementing **Excel reporting** using **Apache POI** and **Spring Boot**.

Technical Skills

Programming & Frameworks: Java, Python, C++, Dart, JavaScript, HTML, CSS, LaTeX, React, Spring Boot, Django, Express, Flutter, TensorFlow, Tailwind, Bootstrap, Node

Cloud, DevOps & Tools: AWS, Azure, Docker, Firebase, Git, GitHub, Gitea, Razorpay

Databases & Security: MongoDB, MySQL, JWT, AES, RSA

Achievements

- * Converted from a **3-month internship to Full Stack Developer within 17 days** at **Esprit** based on outstanding performance; promoted to **Lead Full Stack Developer** within one year.
- * Secured **4th place** in the **Smart India Hackathon (SIH)**, demonstrating strong problem-solving and collaborative development skills.
- * Authored and published a research paper on **Covid-19 Detection Using VGG-16**, applying deep learning techniques for medical image analysis.
